

Fused Glass Sun-Catchers

Presented by: Ed's Emporium
located at 2200 Barksdale Blvd, Bossier City,
approximately 6 miles from the fairgrounds.

Wednesday, Sept. 18, 2019 ONLY
from 2:00 pm-4:00pm.

Minimum number of students is 8 and a maximum of 15

Fused Glass 4" or 6" square hanging sun-catcher:

We will start with a clear glass square base in your choice of 4" or 6", then you will get to create a one of a kind hanging sun-catcher using pieces of colored fusible glass. We will fuse these in our kilns overnight and you will be able to pick them up the next day at about 1:00 pm.

The 4" square is \$20.00 and the 6" square is \$30.00.

Ed's Emporium has been creating original glass work since 1981. We teach classes, make commissions, and do repairs on glass. Copper foil method stained glass, leaded glass, fusing/kiln work, & mosaic are processes used and taught at our studio to create unique art glass pieces.
